DETAILED ACTION

1. Pursuant to MPEP 606.1, the title has been changed to read:

-- SYSTEM FOR ARBITRATING CLOCK SYNCHRONIZATION AMONG NETWORKED DEVICES --

Election/Restrictions

2. Applicant's election with traverse of invention I in the reply filed on April 14, 2005 is acknowledged. The traversal is on the ground(s) that the claims of inventions I and II have an overlapping nature such that a search and examination of inventions I and II can be made without serious burden. This is not found persuasive because invention II serves as means to provide a pre-transmission notification, without regard for whether a first program executed by a microprocessor is interrupted, as claimed in invention I. Likewise, invention I serves as a means to interrupt a first program not used to update the device clock without requiring that a communications module is notified of data to be transmitted to said communications module, as claimed in invention II. Thus, the claims of inventions I and II have non-overlapping limitations, and it would present an unreasonable burden to examine their recognized divergent subject matter.

The requirement is still deemed proper and is therefore made FINAL.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

4. Authorization for this examiner's amendment was given in a telephone interview with Patrick Rasche on June 27, 2005.

5. The application has been amended as follows:

Claims 6-12 and 18-20 are cancelled.
